WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/IL05/00355

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of:

- ☒ the international application in the language in which it was filed
- ☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. ☐ This opinion has been established taking into account the rectification of an obvious mistake authorized by or notified to this Authority under Rule 91 (Rule 43bis.1(a))

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.
- ☐ furnished subsequently to this Authority for the purposes of search.

4. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

5. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/IL05/00355

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>NONE</u>	YES
	Claims <u>1-57</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-57</u>	NO
Industrial applicability (IA)	Claims <u>1-57</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claims 1-57 lack novelty under PCT Article 33(2) as being anticipated by Kott et al (US 6,533,189).

In regard to Claims 1-57, Kott et al teach a chemical mixing device having a flow generator(30) that provides at least two streams of chemicals (26,28) and a mixing chamber (90) that includes at least two inlets adapted to receive the at least two streams of chemicals (26,28) and an outlet (92) through which a mixture of the streams of chemicals (26,28) are ejected from the mixing device (90) and the mixing chamber (90) has an open state in which the chemicals are mixed and a closed state in which the volume of the mixing chamber is less than a fifth of the open state volume. The mixing chamber (90) has a substantially zero volume in the closed state and the mixing chamber (90) has walls that are biased closed in which the walls are pressed against each other. The volume of the mixing chamber (90) from a first mixing point of the streams to the outlet is not greater than 20 cubic millimeters and the chamber (90) is formed of a flexible material. A flow regulator (92) prevents flow into the mixing chamber unless the chemical streams from the flow generator have a pressure above a threshold of at least 2 bar. At least two channels have a decreasing cross section area that is adapted to lead the chemical streams to the inlets of the mixing chamber (90). A first volume when the flow generator is not operating and a second larger volume when the flow generator induces flow of the chemicals into the mixing chamber (90). The mixing device of Kott et al is packaged with the mixing chamber, generator capable of being inside the package. A nozzle (44) is also defined by the mixing chamber (90).

Claims 1-57 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
